Small Grain For Sheep.

There is no question about the necessity of more care than is at present exercised by feeders of sheep in regard to choice of feeds. Those so-called foods which have been in considerable use, such as screenings, damaged grain, and-so to say-the offal of the grain dealers or the threshers or winter comes on; in fact, the more the flouring mills, are of late so nearly cleaned of whatever of actual grain ing the summer and fall, the more has heretofore existed in them as to comfort will they gain when housed DR. be useless for feeding, and on ac in the winter.
